ACCESS FOR STORE BUILDINGS

We have found from past experience, that customers ordering concrete sheds usually require them erecting at the bottom of the garden (not at the side Of the house as with a concrete garage). We therefore must stress that upon delivery of the building, we must have clear and suitable access for a Delivery trolley to be wheeled along your path. The width must be at least 3'6" wide with no steps involved. The concrete panels are 2' X 6'6" high and weight 2cwt each - they cannot be carried.

Optional extras Up & over / roller shutter doors
